

77201-V

High Profile Foot Switch Operated Variable Speed Basic Turntable

OVERVIEW

When you need a way to stretch wrap loads on an infrequent basis, increase worker productivity and minimize worker fatigue consider the 77201-V. With the soft start and stop, loads will not shift or jerk and the speed can be adjusted for lighter loads. Just load the 48" round or octagon turntable, attach the film, set the turntable speed, press the footswitch and wrap the pallet as it turns. The stand alone control panel allows the operator to wrap standing anywhere around the load. The 77201-V is mobile, simple to operate and will eliminate worker fatigue.
